- **Testing**: React-testing-library
- **Database**: MongoDB, NoSQL

PROFESSIONAL EXPERIENCE

Company: Capgemini June 2018 – Present.

Project 1: Discover Financial Services
Duration: March,2019 – Present
Technologies Used: ReactJS, Redux, HTML5, CSS3, JavaScript & Bootstrap.
Role: UI developer
Description: Discover is a banking application where application provides online banking, credit card services. we have followed Agile methodology, which potentially reduced our time and effort. It also helped us to approach the problem in a very different way and in turn boosted our confidence in handling the things. My profile is to understand client requirement and work on user stories. Mainly requirements are requesting backend service for data using axios and also design a responsive website. We are adopting React hooks to design components and Redux for the state management.

Project 2: Farmers Insurance
Duration: September,2018 - March,2019
Technologies Used: Dynatrace, Tealeaf, AppDynamics and Splunk.
Role: Production support
Description: Farmers Fast Quote (FFQ) Application is mainly used by prospective/existing customer for taking quote for their Farmers' Insurance Policies which they are willing to or planning to purchase (or any other sister concern of Farmers, e.g. Bristol West). This application helps the prospect to get a close estimate for their monthly or annual premium which they need to pay for the coverage they are willing to purchase.

COURSES

Front-End Web UI Frameworks and Tools: Bootstrap 4 - Coursera
Front-End Web Development with React - Coursera
